SUMMARY

Impact-driven Software Development Engineer with experience building scalable full-stack applications using React, Node.js, TypeScript, and AWS. Strong foundation in Data Structures, Algorithms, DBMS, OOP, and system design with hands-on experience in API optimization, asynchronous workflows, reusable architecture, and performance engineering. Passionate about solving real-world problems through clean, efficient, and maintainable software.

EDUCATION

Poornima University, Jaipur Bachelors of Technology, Computer Science & Engineering	(2022 – 2026) CGPA: 7.2
RPM Academy, Gorakhpur Class XII (CBSE)	2022 72%
RPM Academy, Gorakhpur Class X (CBSE)	2020 82%

EXPERIENCE

Edunet Foundation (Software Development Engineer Intern)	May 2025 – Aug 2025
Techstack: TypeScript, Node.js, Express.js, React, BullMQ, AWS, Redis, MongoDB – Developed and optimized Rest APIs using Node.js and Express.js, reducing average response latency by ~35% – Implemented asynchronous background job processing using BullMQ , improving reliability and responsiveness – Built reusable React and TypeScript frontend modules , reducing duplication, improved code maintainability – Automated deployment on AWS EC2 machine using Github Action workflows, with zero service downtime – Developed backend test suites to validate API reliability and reduce regression issues during deployments	Remote
Prodigy Infotech Pvt. Ltd. (Software Development Engineer(UI) Intern)	May 2024 – Aug 2024
Techstack: TypeScript, React, Figma, Tailwind CSS, Redux, Playwright – Built 8+ reusable React and Tailwind UI components using TypeScript, reducing duplicate frontend code by ~30% – Optimized rendering performance using Redux-based state management and component memoization, reducing unnecessary re-renders – Converted 10+ Figma designs into responsive production-ready interfaces across 4 major device breakpoints – Integrated 5+ backend API modules using asynchronous React workflows, improving reliability and data consistency – Resolved 20+ UI and state-management bugs through debugging, browser testing, and refactoring across sprint cycles	Remote

PROJECTS

SayItForYou – Anonymous Messaging Platform Techstack: TypeScript, React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB – Designed and deployed a full-stack anonymous messaging platform serving 100+ users with scalable message workflows – Built and optimized REST APIs using Node.js and Express.js, reducing average API latency by ~40% – Integrated MongoDB data models for secure anonymous message storage and efficient user-based retrieval – Developed reusable React and Tailwind UI components with responsive layouts across 5+ device breakpoints – Improved frontend performance by ~35% using lazy loading, caching, code splitting, and asset optimization – Managed AWS-based production deployments with Git-driven CI/CD workflows for streamlined release management

SKILLS

Languages:	JavaScript, TypeScript, Java, C, C++
Frontend:	React.js, Redux, HTML, CSS, Tailwind CSS, Playwright
Backend:	Node.js, Express.js, MongoDB, Springboot, REST APIs, BullMQ, Redis
Cloud & Tools:	AWS, Git, GitHub, Postman, VS Code
Concepts:	Data Structures & Algorithms, OOPs, DBMS, System Design
